

# MAMBOLO

## BIO

Born and raised in Abu Dhabi, MAMBOLO built his reputation on self-expression and connection, bringing people together through his striking beats and unique mixes. He focuses on house music, producing tracks that call to mind a wide variety of musical influences.

He has always been wild about music. He first got into electronic music and music production when he was only 11 because of MTV Music Generator on Playstation 1. Those were important days for him, and he looks back on them fondly. He then dove headfirst into 90s electronic music. Some of his favorites were Enigma, ATB, and Darude. Whatever music will pick people up and spin them around though, that is what he's after. He just wants to see people having an incredible time.

Some of his biggest influences BlackCoffee, Da Capo, Themba and Shimza. He mixes sounds that are somewhere between Afro House, Afro Tech, Tribal and he adds a little Middle Eastern flavor to his music, harking to his Arabic background. Telling stories and entertaining people, he is on a mission to spread happiness, love and peace through beautiful tunes, one track and one show at a time.

In 2018 he founded 971 House Music which is an online electronic music broadcasting platform for streaming live music sessions from Abu Dhabi to the world. 971 House Music supports all local DJs and upcoming talents and together we all share the love and passion of electronic and house music.
