BIOGRAPHY

"From deep and dark melancholic melodies to frenetic and frenzied moments, a true storyteller of the dance floor." Although she had always enjoyed electronic music, it was when she discovered artists like Charlotte de witte, Richie Hawtin and Alignment that she found the inspiration to become a dj and producer herself. Music became her therapy, her passion, her purpose. She puts every extra minute she has into refining her sets, performances and sounds.

"For me it's all about connecting with people, to cut out from their minds every single thought so they can concentrate only on the music. It's about creating an immersive and unique experience"
